An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Party's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

We report that:

- a) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- b) in our opinion, proper books of account as required by the applicable law have been kept by the Party so far as appears from our examination of those books.
- c) the Balance Sheet, Income & Expenditure Account and Statement of Receipts & Payments dealt with by this report are in agreement with the books of account.

Opinion:

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the applicable law in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:
